ARGIN LILAGAN

Facilities Maintenance | Building Automation | Information Technology

Miami, Florida | lilaganargin@yahoo.com

PROFESSIONAL SUMMARY

Facilities maintenance supervisor and U.S. Navy veteran with experience in chilled-water systems, HVAC operations, engineering quality assurance, safety training, and building automation. Pursuing Information Technology studies at Atlantis University with practical coursework in cloud computing, networking, and software development.

PROFESSIONAL EXPERIENCE

KIRA — Facilities Maintenance Supervisor / Chilled Water Technician

July 2025 – Present

• Support facility maintenance operations involving chilled-water plants, HVAC equipment, and building automation systems.

• Troubleshoot chillers, cooling towers, pumps, air handling units, and associated controls.

• Coordinate technical maintenance and troubleshooting activities with service providers and project stakeholders.

United States Navy — Engineering Quality Assurance Inspector / Work Center Supervisor

June 2015 – June 2023

• Performed engineering quality assurance inspections and supported equipment readiness.

• Supervised work-center maintenance activities and supported personnel safety training.

• Maintained technical documentation and promoted adherence to operational and safety procedures.

TECHNICAL SKILLS

• HVAC and building systems: chillers, cooling towers, pumps, air handling units, Siemens controls, Niagara Framework, BACnet.

• Information technology: Microsoft Azure, networking, Linux, Python, Git and GitHub.

• Operations: preventive maintenance, technical troubleshooting, quality assurance, safety procedures, and maintenance documentation.

EDUCATION

Atlantis University — Information Technology | Expected graduation: 2027
